

RUDDER AND RUDDER CONTROL KIT ASSEMBLY INSTRUCTIONS

STEERING DEVICE ASSEMBLY INSTRUCTION

1. RUDDER BLADE ASSEMBLY

Take the rudder blade and insert its bracket (part with holes) into the proper support fixed on the hull stern. Fix it using metal L-shaped pin and introducing it through the proper aligned holes in bracket and support on the stern. Now turn around 90 deg the metal cotter to make pin secured in its position.

2. STEERING PEDALS ASSEMBLY

Take control pedals and insert romboidal nutt into destined slider fixed on the floor. Adjust position of the pedals accordingly to your requirements and tight the screw.

3. STEERING LINES ASSEMBLY

Steering lines are preliminary fixed to the rudder blade on ones ends. Take free ends of lines and insert through holes in rubber breakwater and bumerang on cockpit rear rim. Now attach metal chains to the pedals by use of stainless steel wire thimble. Adjust the pedals to be perpendicular to ther floor surface when steering lines are strained.
